

Town of Huachuca City

Water Tank Improvements, CDBG #132-17

Addendum #2

Issued June 19, 2017

Attention all prospective bidders:

1. Please review the answers to questions submitted by interested bidders:

Question: Is there an engineering firm to contact?

Answer: No

Question: Is there an Engineer's estimate?

Answer: No

Question: Is there a specification cost?

Answer: No

Question: Are there drawings of the mechanical work needed?

Answer: No

Question: Is there a coating survey on the interior and exterior?

Answer: No

Question: What is the diameter and height of the tank?

Answer: 64' diameter, 32' height

Question: Epoxy coating cannot be completed unless tank empty, please clarify.
Answer: yes, use of a temporary water tank will be required to complete this task.

Question: There are repair items that cannot be completed while tank in service, such as adding a manway. Will you allow use of a temporary water storage tank?
Answer: yes

Question: What is the amount of grout material required?
Answer: Unknown, see revised bid proposal.

Question: Will you request a unit cost for extra cubic feet that may be needed?
Answer: See revised proposal form.

Question: #15 PSI could push up on the roof causing rafters to buckle. Will this change?
Answer: Yes, there is no PSI specified, per the tank manufacturer the tank has "atmospheric pressure".

2. A revised bid proposal form and scope of work are attached.
3. Bid opening date will be postponed to 3 p.m. July 6, 2017.
4. Please submit any further questions to Bonnie Williams, project grant administrator, at bwilliams@seago.org.

Thank you for your interest in this project.
